Node.js and APIs: A Match Made in Scaling Heaven

Node.js is perfect for scaling because of its single-thread, event-driven and non-blocking I/O architecture. Many companies have turned to...

Node.js Foundation

Mar 9

Technical Projects

- **Diagnostics** - Inspector, node-inspect, llnode, node-report
- **Node-API** - stable native API for JS VMs
- **HTTP/2**
- **ES Modules**
- **Security WG** - repo for security memos

Microsoft

- Time-Travel Debugging in Node-ChakraCore
- App Insights - event correlation and dependency tracking
- TypeScript - static typing and a language service
- nvs - Node Version Switcher
